## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear if applicant is redefining the dense layer or if the layer further comprises the claimed materials.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan et al (5,803,831). Regarding claim 1, Sullivan discloses a golf ball comprising a core, an inner cover layer, and outer cover layer. The inner cover layer is equivalent to applicant's thin dense layer. Sullivan discloses the inner cover layer may be made from an ionomer neutralized up to 100% (col. 7). The inner diameter of the inner cover layer or the diameter of the core is from 1.2-1.6 inches or 30.5-40.6 mm (col. 24). The thickness of the inner cover layer is from 0.01 to 0.10 inch or 0.254 to

Art Unit: 3711

2.54 mm (col. 24) and is positioned at a distance less than 2.54 mm from the surface of the ball; the thickness of the outer cover layer is from .01 to 0.10 inch or 0.254 to 2.54 mm (col. 24). The specific gravity of the layer is considered an obvious modification since the material type and dimensions are equivalent to applicants. Regarding claim 9-12, the outer cover layer has a Shore D hardness of 55 or less (abstract). One of ordinary skill in the art would consider the specific gravity of the inner cover layer an obvious modification since the material type and dimensions are equivalent to applicants.

Claims 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan et al (5,803,831) in view of Sullivan et al (6,142,887). Sullivan discloses the invention as shown above but fails to disclose a foamed core with a density less than 1. However the '887 patent teaches a solid or foamed core. A foamed core would obviously have a specific gravity less than 1. One of ordinary skill in the art would have modified the core for enhanced performance.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3711

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-57 of U.S. Patent No. 6,743,123. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant invention and the '123 patent claim golf balls comprising a core, an intermediate/dense layer and cover. Rearranging the limitations does not render a patentable distinction.
